

*Research Experience for Undergraduates  
May 30-July 29, 2017*

The Nanotechnology Collaborative Infrastructure-Southwest (NCI-SW) at ASU is pleased to offer a stimulating nine week summer program for undergraduates from accredited community colleges and universities (students from ASU are not eligible).

Participants will work with nationally recognized scholars in nanotechnology research, and leaders in science education, at the southwest regional hub of the National Nanotechnology Coordinated Infrastructure.

- Explore the world of the very small in a variety of state-of-the-art laboratories.
- Conduct research with the nation's top nanotechnology scientists.
- Gain new skills and valuable experience.
- Establish long-term relationships with ASU faculty, staff and graduate students.
- \$5,000 stipend.

Application deadline: March 1, 2017 - Must be a U.S. citizen or permanent resident

**About the NCI-SW:**

*NCI-SW is funded by the National Science Foundation (NSF) to support nanoscale science, engineering and education, and also to grow the manufacturing industries of the 21<sup>st</sup> Century. Launched in late 2015, NCI-SW is run by Arizona State University in partnership with the Maricopa Community Colleges and Science Foundation Arizona.*
